

Worm castings have some amazing benefits! Worm castings are the all-natural, organic amendment, that is a must-have in most gardening situations. One of the best tools available to improve root development and nutrient uptake, which is what feeds your plants!

The fungal properties of worm castings adds natural biology to your soil allowing it to be a healthy soil. It helps with water retention and pH balance. As a result of it's moisture holding capabilities Worm Doo also helps with long-term erosion.

The effect that castings have upon flowers can be stunning to behold. Not only does the increased plant vigor make the plant look better, but it can increase the plants resistance to disease, by allowing the plants' own natural defenses to do what they were designed to do.

USE: Sprinkle over soil and scratch in. It can also be used to make worm castings tea.
