

Dewitt Weed Barrier

Environmentally safe fabric controls weeds before they start without chemicals.

SOIL EROSION CONTROL

Protect your soil from raining or watering, and keep your place clear and neat. LONG TERM

DURABILITY Heavy duty weed fabric will last many

years against UV deterioration, water cleaning to be reusable

ROWS LINE DESIGN Make it easy for your planting management, if you have to make planting holes in rows. 3.0oz high strength pp woven fabric for mini raised bed or backyard. Weed control fabric helps with drainage and keeps the ground clean, landscape and guiding. Widely used for weed barrier, irrigation work, road paving, building project.

Landscape tarp performs well in filter, drainage, isolation, protection and reinforcement. Weed control cloth prevents direct sunlight. Strong structure of the fabric itself prevents weed or grass from going through, effectively inhibit the growth of weed or grass. Timely exclusion of ground water keeps the ground clean. Rapid drainage of surface water together with the pebble layer and sand layer under the ground cloth can effectively inhibit the reverse osmosis of soil particles.
