

Sea Spray

Create a chippy, textured and weathered look with Sea Spray, an all-natural, texture additive.

Mix two scoops of Sea Spray with 8 oz of the Dixie Belle Paint. If needed mix another 1/2 scoop until you achieve a thick, brownie batter-like consistency.

Using a brush, dab and smooth the bristles to form crests and peaks, just like ocean waves. Once tacky, gently brush down the crests and peaks, calming the seas and creating texture. You can also leave as is, keeping the seas stormy!

For more dimension, add a glaze or another paint color with or without Sea Spray. Learn more on the **Dixie Belle Paint Company Blog**.

This bag of Sea Spray is enough for two quarts of paint. The measuring scoop is included with the bag.

Please Note: We recommend proper lung and eye protection when using this product because of its powder consistency.
