

Mad Mats®

Fully weatherproof, they look great on patios, decks, and poolside. And as all our products, these mats are utterly carefree and easily cleaned with garden friendly soap and a hose.

100% recycled plastic, UV protected, fade-proof, 1 year guarantee — pattern and size may vary.

POLYWOOD® All-Weather Durability

POLYWOOD furniture is built to withstand all four seasons and a range of climates including hot sun, snowy winters, salt spray, and heavy winds. Unlike traditional wood furniture, POLYWOOD furniture will never need to be sanded, painted or stained.

Today, POLYWOOD recycles an average of 400,000 milk jugs per day. Truckloads of recycled milk jugs are transformed into genuine POLYWOOD lumber which is then used to construct our wide array of Adirondack chairs, rocking chairs, benches, gliders, deep seating, dining, and more!

Adirondack chairs, rocking chairs, benches, gliders, deep seating, dining, and more!

In the late 1980's government mandated recycling programs were in full swing. As the use of plastic in the U.S. grew, the need to transform the overabundance of recycled plastic into something new was greater than ever. High-density polyethylene (HDPE) plastic, in particular, is extremely durable and weather resistant. Outdoor furniture was the perfect application. Not only is genuine POLYWOOD lumber extremely durable and weather

resistant but it's also available in a wide array of colors. From traditional browns and classic whites and grays to ocean-inspired blues and bold reds, there is an abundance of hues at your disposal. Explore all POLYWOOD color options to find the perfect furniture colors for your own outdoor retreat.

BREEO ZENTRO

The Zentro smokeless fire pit *insert* makes a perfect addition to your backyard!

Designed to slide easily into a new or existing block or masonry fire pit, the Zentro is the ultimate fire pit upgrade!

Sleek & modern, with clean lines and an air of sophistication, while maintaining the raw & primal aesthetic of real wood fire.

Now with our patent-pending X Airflow system for optimal primary air! No moving parts, simply drop into your paver, block or stone fire pit and you are done!

Zentro is built 100% in America and is backed by a Lifetime Warranty. Each unit weighs over 100 pounds of heavy gauge steel!

NOTE: For optimal air flow, your fire pit surround should have a depth of at least 15 inches, allowing 3 inches of space between the bottom of the insert and the ground.

LID IS INCLUDED

Comes in 24", 28" and 32" sizes
